Subject: Media Inquiry Hunters Point rescanning- DRAFT

Hi Lily,

I'm hoping you can help me out. I'm responding to a media request (due COB today). Do you know for the 2 of 9 building in Parcels C and E (building 271 – 100% rescan for all Class 1 Survey units) and building 406 in Parcel E (rescan 10% of class 1 survey units and survey unit 21), when these scans were completed? Nina is out on vacation, but she told me that she thought the scanning was done, but that the results aren't yet available. I don't see a report for this in ENVIROSTOR either –looks like it might come later this year.

Do you know when the scans were completed by the Navy's contractor (I'm assuming Tetra Tech?) and do you have further info about when we are likely to expect the reports with the rescan data for Parcels C and E?

Any help you can provide would be greatly appreciated. Please respond at your earliest convenience.
